

MOTION TO ACCEPT THE FILING AS TIMELY FILED

To: The Federal Communications Commission
Washington, D.C. 30554

From: Texas Healthcare Information Network Collaborative

Date: May 9, 2007

Docket: WC Number 02-60
Rural Health Care Pilot Program

The Texas Healthcare Information Network Collaborative and its named applicant, Christus Systems, respectfully request that the Commission accept and confirm our application for the Rural Health Care pilot grant program as timely filed.

Responding to the FCC *Rural Health Care Pilot Program Order* a collaborative group of Texas nonprofit entities, including the University of Texas, Texas A&M, Christus Health System and others, submitted a statewide grant application to the FCC.

Attempts to file this application using the Electronic Comments Filing System (EFCS), made at a time near, but before the deadline on May 7, 2007, encountered difficulties and delays. FCC network server operating logs should be able to document that diligent effort was made by applicant prior to the midnight grant application deadline and this application was entered successfully into the EFCS system.

However, when the THINC application was finally accepted by the EFCS system receipt notice was received by the sender at 12:02 am., approximately 70 seconds past midnight, and bore the date: May 8, 2007.

We respectfully submit that the applicant made duly diligent, timely and documentable efforts in submitting this application, and we respectfully request the Commission accept and confirm this application as timely filed for the grant program requirements.

Respectfully Submitted,

Texas Healthcare Information Network Collaborative
